Vertical section with extended side body

- Robust supporting structure made of Corten steel with corner blocks according to ISO 10'-1CC. The walls are made of corrugated sheets (of various cross-sections), which, in addition to providing containment, also fulfill the function of stiffening.
 - In the front area of the personnel access there are two closing doors that are equipped with all-round seals and tension rods. When closed, the bars also take on a bracing function.
 - Capable of being transported by ordinary vehicles, in addition to international standards (sea freight, rail transport, container vehicles, etc.).
 - Expandable in volume with self-supporting and perfectly sealed "drawer" system via simple manual extension from the main body.
 - Step-free floor covering made of non-slip rubber on a waterproof, multi-layered wooden base. Easy cleaning.
 - Two frames made of aluminum profiles, one serves as a window and the second as a door for the workshop.
 - Insulated equipment compartment in the rear area.
 - Paint and finish of your choice with individual labeling for quick identification.
 - Dimensions "closed": L.2991 x W.2438 x H.2591 mm (according to ISO 10'-1CC), dimensions "open": L.2991 x W.3500 x h. 2591 mm.
 - Total weight: approx. 2,500 kg
- 230V power supply via external power grid or generator.
 - Internal electrical panel for external branches and protection devices in accordance with current regulations.
 - Internal LED lighting system and power outlets distributed both at workstations and for specific devices.
 - Module equipment:
 - 1 fixed workbench on the wall with a top made of "oil-resistant" Rubber and lower drawers L.1500 x W.700 x H.885 mm, complete with vice
 - 1 wall fitting for attaching tools / work equipment.
 - 1 shelf with 5 shelves 900 x 500mm made of galvanized steel, on the wall attached
 - 1 cabinet, W. 1000 x D. 500 x H. 1980 mm
 - 1 power generator 3.6 kW
 - 1 folding telescopic ladder
 - Portable air compressor of approximately 50 liters.
 - Grounding system with bolt connection for ground spike
 - Use: ideal for autonomous teamwork.
 - Commissioning: approx. 20 minutes, with trained staff.
